22 August 1956

MEMORANDUM FOR: Project Director
SUBJECT: Use of AQUATONE Operational Information

1. You recall that when you looked at the attached you raised a question about the security in regard to dissemination to NSA and other agencies of the following types of information:

- a. Flight logs
- b. Electronic reconnaissance logs
- c. Photo interpretation reports
- d. Pilot interrogation reports

I indicated that I would reexamine this matter with Operations and report.

2. I have discussed this with [] and he said that his concern was not with security but the possible work load this will make on either the field or his office. Arrangements which have been established for the dissemination do not impose any extensive work load on either of those places.

[]
JAMES Q. REBER
